WORLD HEALTH SUMMIT  
BERLIN, GERMANY & DIGITAL  
OCTOBER 24-26, 2021

"No-one is safe from COVID-19; no-one is safe until we are all safe from it. Even those who conquer the virus within their own borders remain prisoners within these borders until it is conquered everywhere."

**FRANK-WALTER STEINMEIER**  
Federal President, Germany

"All countries have signed up to Universal Health Coverage by 2030. But we cannot wait ten years. We need health systems that work, before we face an outbreak of something more contagious than COVID-19; more deadly; or both."

**ANTÓNIO GUTERRES**  
Secretary-General, United Nations

"All pulling together—this must be the hallmark of the European Health Union. I believe this can be a test case for true global health compact. The need for leadership is clear and I believe the European Union must assume this responsibility."

**URSULA VON DER LEYEN**  
President, European Commission

"We firmly believe that the rights of women and girls are not negotiable."

**NATALIA KANEM**  
Executive Director,  
United Nations Population Fund (UNFPA)

"Governments of countries that are doing well during the pandemic have not only shown political leadership, but also have listened to scientists and followed their recommendations."

**SOUMYA SWAMINATHAN**  
Chief Scientist, World Health Organization (WHO)

"The lesson is clear: a strong health system is a resilient health system. Health systems and preparedness are not only an investment in the future, they are the foundation of our response today."

**TEDROS ADHANOM GHEBREYESUS**  
Director-General, World Health Organization (WHO)

"If we don't address the concerns and fears we will not do ourselves a favor. In the end, it is about how technology can be advanced as well as how we can make healthcare more human."

**BERND MONTAG**  
President and CEO, Siemens Healthineers AG, Germany

"Through collective efforts and sustained worldwide collaboration, we can move towards a world in which all cancer patients have access to high quality care, regardless of where they live. With more intelligent data, insights and solutions, companies and industry partners are contributing to the achievement of this goal."

**DOW WILSON**  
President and CEO,  
Varian Medical Systems, USA

"The pandemic has brought to light the importance of digital technologies and how it can radically improve health outcomes and save lives."

**STELLA KYRIAKIDES**  
Commissioner for Health and Food Safety, European Commission

"Academic collaboration is in place and is really a bridging partnership. It bridges hemispheres and bridges cultural backgrounds."

**CHRISTIAN DROSTEN**  
Director of the Institute of Virology,  
Charité – Universitätsmedizin  
Berlin, Germany

"We believe in partnership. And we believe in collective action. And I feel that the world since some time has moved away from collectiveness."

**MICHELLE BACHELET**  
High Commissioner for Human Rights,  
United Nations

## 3 DAYS · 50 SESSIONS · 100 NATIONS · 300 SPEAKERS · 6,000 PARTICIPANTS ONSITE & ONLINE

The World Health Summit is one of the world's leading strategic forums for global health. Held annually in Berlin, it brings together leaders from politics, science and medicine, the private sector, and civil society to set the agenda for a healthier future. The World Health Summit was founded in 2009, on the occasion of the 300th anniversary of Charité.

### GOALS

- Improving health worldwide
- Bringing together stakeholders from all sectors
- Facilitating constructive exchange in an environment of academic freedom
- Finding answers to major health challenges
- Making recommendations and setting health agendas

### SPEAKERS AND PARTICIPANTS

- Leading scientists and medical professionals
- Ministers and civil servants
- High-ranking officials at international organizations
- CEOs from industry and civil society
- Young professionals and students

### PRESIDENTS

- World Health Summit President  
Axel R. Pries, Dean,  
Charité – Universitätsmedizin Berlin
- Annual International President  
Provided by the M8 Alliance,  
on a rotating basis

### PATRONS

- The World Health Summit is traditionally held under the patronage of:
- Chancellor of the  
Federal Republic of Germany
  - President of the  
French Republic
  - President of the  
European Commission
  - Director-General of the  
World Health Organization  
(WHO)

### RESULTS

- M8 Alliance Declaration
- Statements and recommendations for national academies, governments and international organizations
- Session reports

### INITIATIVES

The World Health Summit supports young experts and innovative ideas:

- Entrepreneurs in Global Health
- New Voices in Global Health
- IAP Young Physician Leaders

### M8 ALLIANCE

The M8 Alliance of Academic Health Centers, Universities and National Academies is the academic foundation of the World Health Summit. It is a growing network and currently consists of 30 members in 20 countries.

## GENERAL TOPICS

- Basic Biological & Medical Research
- Clinical & Patient Research
- Pandemic Preparedness
- Diagnostics & Therapy
- Medical Technology & Engineering
- Health Policies & Systems
- Universal Health Coverage
- Translational Science & Medicine
- Public Health & Prevention
- Specific Diseases & Disorders
- Patient Safety
- Healthcare Facilities
- Drugs & Vaccines
- Regulatory Aspects
- Health Visions, Strategies & Ethics
- Evolutionary Medicine
- Demographic Change & Healthy Aging
- Global Health & Development

## SESSION FORMATS

### Keynotes

- 90 minutes
- Max. 5 speakers
- Up to 800 participants onsite

### Panel Discussions

- 90 minutes
- Max. 6 speakers
- Up to 300 participants onsite

### Workshops

- 90 minutes
- Max. 6 speakers
- Up to 150 participants onsite

---

## The World Health Summit 2021 will take place from October 24–26 in Berlin and online.

The COVID-19 pandemic showed very clearly, how essential the improvement of global health is and how crucial cooperation and solidarity remain.

The World Health Summit and its academic backbone, the M8 Alliance, are confident that only with collaboration and mutual assistance beyond all borders global health crises can be tackled.

An international, interdisciplinary, and intersectoral forum like the World Health Summit, where leading experts from science, politics, business, and civil society from all over the world come together in an environment of academic freedom, couldn't be more important.

## PATRONS 2021

---

**ANGELA MERKEL**  
Chancellor of the Federal  
Republic of Germany

**EMMANUEL MACRON**  
President of the  
French Republic

**URSULA VON DER LEYEN**  
President of the  
European Commission

**TEDROS ADHANOM  
GHEBREYESUS**  
Director-General of the  
World Health Organization

## PRESIDENTS 2021

---

**CHARLES IBINGIRA**  
Makerere University, Kampala, Uganda

**AXEL R. PRIES**  
Charité – Universitätsmedizin Berlin, Germany

## REGIONAL MEETINGS 2021–2022

---

**2021, June 27–30**  
Kampala, Uganda & Digital

**2022**  
Rome, Italy

## **Vaccines: Moving Towards Health as Global Public Good**

Equal access for all to a COVID-19 vaccine has been a dominant political demand throughout the pandemic. How far have we advanced sharing the vaccine equitably and ensuring that it is considered a global public good? What political lessons have we learned also for other areas of global health? What instruments can help ensure global public goods for health?

## **Expanding The Role of the European Union in Global Health**

The initiatives to create a European Health Union entail an important political opportunity to strengthen the global health role of the EU. The EU's internal legal and political capacity for health immediately interacts with its goals in global health. A stronger global health role of the EU will bring geopolitical advantages, but will also benefit the global community as well as EU Member States internally. It affects many areas of EU policy including development policies, foreign policies and setting safety standards that impact global health, in areas such as food safety, chemical safety, environmental policies and more recently digital health.

## **WHO Council on the Economics of Health for All**

Global Health needs new economic thinking—a proactive Health for All economic agenda, to shape our economies so they truly have wellbeing and inclusion at the center of how we create value, measure it and distribute it. Returning to the status quo following the pandemic will not be enough—WHO calls for innovation-led transformation of health systems to achieve economic well-being everywhere. We must rethink how we value health. The time has come for a new narrative that sees health not as a cost, but an investment that is the foundation of productive, resilient and stable economies.

## **The Intersection of COVID-19 and Mental Health**

Mental health problems affect us all. The massive unmet need for care, the abuses of fundamental rights of people with mental health problems, and the very low investment in mental health care nationally and through development assistance, are unacceptable, especially during this pandemic. Quite simply, mental health is the orphan child of the health care system and all countries are developing when it comes to mental health. No country will achieve the aspirations of Universal Health Coverage and an effective Health in All Policies approach to the pandemic without addressing mental health, for health care cannot be universal without mental health.

## **Artificial Intelligence in Global Health(care)**

Artificial intelligence has led to improvements in areas of healthcare such as medical imaging, automated clinical decision-making, diagnosis, prognosis, and more. Although AI possesses the capability to revolutionize several fields of medicine, it must be bound by ethical and regulatory approaches that ensure patient's rights.

## **Pandemic Preparedness: Lessons From COVID-19**

The global response to COVID-19 has called our global pandemic preparedness into question. Now we must build with urgency on experiences made. New forms of collaboration and strengthened partnerships have emerged as central to the response. We have seen unprecedented speed to develop the tests, treatments and vaccines needed to keep the world safe. But the question remains; from science and research to policy and implementation, has the world truly shifted in terms of our ability to react? How can we build towards the future after COVID-19, and ensure preparedness for the challenges to come?

# LOOK BACK: WORLD HEALTH SUMMIT 2020

8

Due to the COVID-19 pandemic, the World Health Summit 2020 took place as a fully digital, interactive conference with cost-free availability of the entire program. All keynote sessions, panel discussions and workshops were broadcast live digitally and are available online.

## FACTS

<b>3</b> days	<b>104</b> nations	<b>2,047</b> participants at opening session	<b>34</b> country representation per session (average)
<b>53</b> sessions	<b>329</b> speakers	<b>13,018</b> additional views on YouTube (within first week after summit)	<b>48%</b> female speakers
<b>78.5</b> total broadcasting hours	<b>6,217</b> participants		<b>52%</b> male speakers

## PATRONS

"The key to containing and overcoming the pandemic can only be found in international cooperation and coordination. That is why I am deeply grateful to you for contributing your expertise to the World Health Summit, exchanging findings and drawing up recommendations."

**ANGELA MERKEL**  
Chancellor of the Federal Republic of Germany

"The World Health Summit has made us understand that the scientific world can help us make better decisions on global health. I call here for a global health policy that are based on the latest scientific knowledge, that can be shared and proved accurate by peer review."

**EMMANUEL MACRON**  
President of the Republic of France

"This twelfth edition of the World Health Summit is anything but business as usual. With all continents hit by COVID-19 in 2020, this World Health Summit is the first one since the World Health Organization has characterized this virus as a pandemic. From all over the world, health experts and leaders are gathering this year again in Berlin to draw the lessons and consequences of this pandemic. There is so much to be learnt and shared."

**URSULA VON DER LEYEN**  
President of the European Commission

"This will not be the last pandemic or global health emergency we will face. When the next one comes, the world must be ready. Part of every country's

commitment to build back better must therefore be to public health, as an investment in a healthier and safer future."

**TEDROS ADHANOM GHEBREYESUS**  
Director-General of the World Health Organization (WHO)

## SUNDAY, OCTOBER 25

"(...) And yet, with people only connected via screens, an international community has nonetheless come together. Perhaps the seemingly paradox situation of a World Health Summit which has never been so important and yet which has never physically brought together so few people as this year, perhaps this paradox situation in fact contains a key to understanding our situation in these times of COVID-19."

**FRANK-WALTER STEINMEIER**  
Federal President, Germany

"In today's world, we need to look after our health by looking after our planet, our wellbeing and our sustainable development. And we need to do it together—through global health cooperation and not through global health competition. This is the aim of this conference. And this is what you can count on Europe for in the difficult period ahead and in the decade that follows."

**URSULA VON DER LEYEN**  
President, European Commission

"The World Health Summit and the M8 Alliance are important platforms to champion and work together for global health. This gathering, bringing together science, politics, business and civil society, is the place to build new partnerships, share best practices and take decisions that could save lives."

**ANTÓNIO GUTERRES**  
Secretary-General, United Nations

“The pandemic has brought the critical link between human health and economic growth to the front and center.”

**PAUL HUDSON**  
CEO, Sanofi, France

“Safe and effective vaccines will be especially critical to defeating COVID-19. It’s also important that we continue to prioritize vaccination against diseases that are already preventable, to help protect the most vulnerable among us.”

**NANETTE COCERO**  
Global President of Pfizer Vaccines, Pfizer, USA

“We need a common understanding and global approaches to dealing with COVID-19 and subsequent pandemics. I am delighted to be taking part in this year’s digital World Health Summit to discuss one of today’s most urgent topics: pandemic preparedness.”

**TEDROS ADHANOM GHEBREYESUS**  
Director-General, World Health Organization (WHO)

“We strongly advocate a holistic and science driven approach to solving these global challenges to health. We need a holistic view on health, which includes our biology, our environment and our lifestyle: One Health and Planetary Health. The 17 Sustainable Development Goals SDGs provide such a holistic framework.”

**DETLEV GANTEN**  
Founding President, World Health Summit, Germany

“Human rights must be at the heart of the response to the crisis.”

**WINNIE BYANYIMA**  
Executive Director, Joint United Nations Programme on HIV and AIDS (UNAIDS)

## MONDAY, OCTOBER 26

“The EU has openly committed to playing a more active role in global health.”

**MARTA TEMIDO**  
Minister of Health, Ministry of Health, Portugal

“It is a scandal that as we speak, half of the African continent does not have access to one radiotherapy unit. It is a scandal that 300,000 women die every year from cervical cancer.”

**RAFAEL MARIANO GROSSI**  
Director-General,  
International Atomic Energy Agency (IAEA)

“What we really need is bold action, political will.”

**THOMAS CUENI**  
Director-General,  
International Federation  
of Pharmaceutical  
Manufacturers &  
Associations (IFPMA),  
Switzerland

## TUESDAY, OCTOBER 27

“Bringing the Global Action Plan to life means making it as practical as possible at the country level. The plan represents a major change in how agencies, NGOs and governments collaborate for stronger health systems.”

**HENRIETTA FORE**  
Executive Director,  
United Nations Children's Fund  
(UNICEF)

“There is a broader need to rethink how we pay for our ability as society, as individual countries, but also as a global community, to respond to future crises.”

**FRANCESCA COLOMBO**  
Head of the Health Division, Organization for Economic  
Cooperation and Development (OECD), France

“How can we stay focused on serving our communities? In putting aside organizational rivalries at national and international level and focussing on the people we serve. Leaving aside our needs to publish or our needs to be visible.”

**MIKE RYAN**  
Executive Director,  
World Health Organization  
Emergencies Programm  
(WHO)

## 1 No one is safe until all are safe.

This global health guiding principle stands at the centre of fighting COVID-19 and it stood at the centre of this year's 2020 virtual World Health Summit. Health is more than medicine, it is more than basic research, it is the essence of a functioning society. It is a political choice.

**The World Health Summit calls on decision makers around the world to act according to this principle.**

## 2 The pandemic is raging world-wide.

At the World Health Summit, political leaders, high level speakers, experts, business representatives and civil society and community voices reinforced that global solidarity embedded in strong multilateral organizations is the key to the response. Now it requires an unprecedented international effort not only to take determined public health measures forward and to strengthen scientific cooperation and research but also to address the social and economic consequences of the pandemic.

**The World Health Summit stands by its deep commitment to multilateralism, health diplomacy and international cooperation in science and research. It strongly supports the increasing cooperation between international organizations for health.**

## 3 The Coronavirus pays no respect to borders.

The world must act as a global community and on many fronts. The corona pandemic is not a single-issue pandemic—it is a syndemic, impacting on societies in a multitude of ways, uncovering deep inequalities and structural disadvantages linked to a wide range of health determinants. Examples are the secondary health crises with women, children and adolescents further

marginalized. Never has the principle of health in all policies that the World Health Summit stands for been more applicable. To stem the pandemic not only “at home” but everywhere, the global community must use every tool at its disposal throughout the multilateral system to leave no-one behind. There is a strong need for collaboration and efforts to protect, promote and accelerate health gains and gender equity. There can be no health security without social security and access to health services and medicines. This includes TRIPS waivers through the World Trade Organization for COVID-19 therapeutics, diagnostics and vaccines as requested by a group of countries.

**The World Health Summit stands by its commitment to equity in global health.**

## 4 The required COVID-19 responses range far beyond the global health organizations—

they require determined decisions by political bodies such as the G7 and the G20, financial institutions such as the IMF and the World Bank and many other development banks. Financing global health action has already reached new dimensions—it requires billions not millions. Equitable distribution of a COVID-19 vaccine through the COVAX mechanism is estimated at \$ 35 billion. But other short-term financing measures are also required, such as debt cancellation for the poorest countries. The world is paying the price for the lack of investment in preparedness and sustainable financing models. As millions fall back into poverty, the global health system can no longer build on charity, philanthropy, and development finance—it will require new mechanisms to ensure more sharing of wealth and knowledge by investing in global public goods for health, first and foremost a people's vaccine.

**The World Health Summit is clear in its rejection of vaccine nationalism.**

## 5 The Coronavirus pays no respect to politics,

but it has uncovered deep political fault lines at national and international level which have hampered the response to the pandemic. It has uncovered that even countries with strong health systems fail in the response to the pandemic if political decision making is not rapid and determined. Too frequently communities have not been involved in the response. Gender disparities have been reinforced. Infodemics are spreading rumours, conspiracies and false information. Countries with low trust in government have performed badly and many democracies were inadequately prepared for the restrictive measures they needed to implement to save lives. There is deep concern that some of the major powers are not part of the global effort to ensure a collective and effective response and to support the World Health Organization as well as new mechanisms for developing and sharing COVID-19 vaccines such as COVAX.

**The World Health Summit is steadfast in its support of the WHO and calls for stronger political and financial support of the organization. It welcomes the many initiatives the WHO has initiated with partners to enable a global response. It welcomes the strong support to the WHO expressed by Germany and the European Union on occasion of the World Health Summit.**

## 6 The Coronavirus has also highlighted the fault lines in health systems around the world.

The lack of investment in UHC, in public health infrastructure and in preparedness is not only endangering the COVID-19 response—it is imperilling the achievement of the Sustainable Development Goals. Too many people around the world cannot benefit from global health advances. Attention and treatment for other diseases is no longer available as health professionals

and institutions need to focus on the pandemic, vaccination rates for children have dropped, not enough services are available to deal with the mental health and domestic violence problems that have increased with the pandemic. The lack of will in addressing non-communicable diseases has come back with a vengeance, as enhancing susceptibility to COVID-19. Health professionals—most of them women—have paid a high price. Most countries still lack strong primary health care systems and robust mechanisms for community engagement. Many have not invested in the potential of digital health.

**The World Health Summit reiterates its deep commitment to Universal Health Coverage UHC through public financing and to innovation that makes health care more accessible and equitable.**

## 7 The pandemic risk is not the only risk the world faces.

The World Health Summit 2020 program deliberated many challenges and priorities in global health other than COVID-19. The discussions clearly demonstrated the interconnectedness and accumulation of risks—for example, the interconnectedness of climate change, the ecological and the pandemic challenges or the continuous challenge of Anti-Microbial Resistance. Preparedness must include early multi-hazard warning systems—a point to consider as countries re-examine the Internal Health Regulations.

**The World Health Summit will continue to promote integrated approaches to global health challenges such as ONEHEALTH and Planetary Health.**

This year's World Health Summit was different. Not only because it was virtual but because it made abundantly clear how our future is tied up together in the face of a pandemic.

**No one is safe until all are safe.**

## World Health Summit Regional Meeting – Uganda June, 27–30, 2021 Kampala & Digital

### HOSTS

**Makerere University in partnership  
with the Government of Uganda**

“We are extremely delighted to be leading the preparations for the World Health Summit Regional Meeting, the first ever to be hosted on African soil. With health professionals

and other stakeholders in government and the private sector coming together, I'm optimistic that the meeting will stir us all to think better and work harder to achieve the Sustainable Development Goals, all of which pertain to health, whether directly or indirectly.”

**CHARLES IBINGIRA**

Former Principal of the College of Health Sciences at Makerere University and International President of the World Health Summit 2021

Makerere is Uganda's largest and oldest institution (circa 1922) of higher learning and one of Africa's best. Composed of nine colleges and one school, Makerere offers 284 programs to about 36,000 undergraduates and 4,000 postgraduates and has remained a center of academic excellence for the past 90 years.

Makerere University College of Health Sciences (MakCHS) is the leading medical research center in the region with four schools: Public Health, Bio-Medical Sciences, Medicine, and Health Sciences, offering 23 degree programs and graduating 600 health professionals annually. A key institution in both infectious and non-communicable diseases, MakCHS has made tremendous contribution to science globally over the years with key breakthroughs that have contributed to WHO treatment guidelines.

“As the government, we pledge total support to this important event that has since 2009 done much to ensure that the health of the global community is improved.”

**RT. HON. RUHAKANA RUGUNDA**  
Prime Minister of Uganda

“This is a great opportunity for the world to focus on Africa's health, learn from its successes, and lay strategies for future collaborations.”

**JANE RUTH ACENG**  
Minister of Health, Uganda

The M8 Alliance is the academic foundation of the World Health Summit. A unique network of 30 leading international academic health centers, universities, and research institutions from 20 countries, it includes the InterAcademy partnership for Health (IAP), which represents all national academies of medicine and science.

All M8 Alliance members are committed to improving global health and working with political and economic decision-makers to develop science-based solutions to health challenges worldwide.

In addition to the annual World Health Summit in October in Berlin, the M8 Alliance organizes annual Regional Meetings, regular Expert Meetings, and Summer Schools in different parts of the world.

## REGIONAL MEETINGS

# M8Alliance

Academic Health Centers, Universities and National Academies

## Charité – Universitätsmedizin Berlin, Germany

Europe's largest university clinic—and its oldest and most prominent hospital—is located in the German capital. Eleven Nobel Laureates have worked at Charité.

## Imperial College London

## Imperial College London, UK

The Imperial College of Science and Technology was created as a constituent college of the University of London. Fully independent since 2007, the Imperial College London attracts students from more than 100 countries.

## American University of Beirut, Lebanon

The Global Health Institute at AUB addresses global health challenges with a focus on context and sustainable impact by employing an interdisciplinary approach. The primary focus are challenges that are affecting the MENA region, but have relevance to and impact on other regions in the Global South..

## InterAcademy Partnership for Health (IAP)

The IAP for Health combines the expertise and impact of all National Academies of Medicine and Science worldwide to advance sound policies, promote excellence in science education and improve public and global health.

## Association of Academic Health Centers International (AAHCI)

The AAHCI is a global non-profit organization that aligns efforts among health professionals in education, research, and patient care.

## Istanbul University, Turkey

With origins dating back to 1453, Istanbul University is an internationally recognized institute of higher learning with over 170,000 students and 22 faculties dedicated to research and education.

## Chinese Academy of Medical Sciences & Peking Union Medical College, China

The college is among the most selective medical institutions in the People's Republic of China and one of its top two universities.

## Johns Hopkins Bloomberg School of Public Health, USA

A fully accredited private institution, the JHSPH was the first public health facility in the world, and it remains the largest school in the field.

## Coimbra Health, Portugal

Over 700 years old, the University of Coimbra is a keystone of European and global scientific culture, as well as a UNESCO World Heritage Site. Together with the Coimbra Hospital and University Center, it forms Coimbra Health.

## Karolinska Institutet, Sweden

Karolinska Institutet is Sweden's largest medical academic research center and one of the world's foremost medical universities. It is home to the assembly that selects Nobel laureates in physiology or medicine.

## Consortium of Universities for Global Health (CUGH)

CUGH is a network of over 170 academic institutions and organizations around the world addressing global health challenges.

## Kyoto University Graduate School of Medicine, Japan

The first institution of its kind in Japan, the Kyoto Imperial University College of Medicine was founded in 1899. Its successor, the Kyoto University School of Public Health, was established in 2000.

## Geneva University Hospitals, Switzerland

The Geneva University Hospitals are heirs to a centuries-long tradition of excellence in medicine and science. The HUG represents a merger of all public hospitals in Geneva.

## London School of Hygiene & Tropical Medicine, UK

Founded in 1899, the London School of Hygiene & Tropical Medicine is one of the leading research-focused graduate schools in the world.

## Graduate Institute Geneva, Switzerland

A semi-private postgraduate institution, the Graduate Institute Geneva was the first university in the world to be dedicated solely to the study of international affairs.

## Makerere University, Uganda

One of the oldest and most prestigious centers of learning in Africa, Makerere University is home to a staff of over 4,000 and more than 40,000 students.

### Milken Institute School of Public Health, USA

The Milken Institute School of Public Health at George Washington University was established in 1997 and is the only school of public health in Washington, DC.

### Monash University, Australia

As Australia's largest university—with approximately 60,000 students from over 170 countries—Monash has seven campuses: five in Victoria, one in Malaysia and another in South Africa.

### Montreal Clinical Research Institute, Canada

The IRCM was the first independent academic research center in Quebec to bring basic and clinical researchers together under a single roof.

### National Taiwan University, Taiwan

Known for its diverse and international curriculum, National Taiwan University is made up of 11 colleges, 54 departments and 105 graduate institutes. It has a student body of around 30,000.

### National University of Singapore

Founded in 1905, the National University of Singapore today consists of 16 different faculties and schools. Around 37,000 students can be found on its three campuses in Singapore and seven overseas locations.

### Russian Academy of Medical Sciences, Russian Federation

Set up in 1944, the USSR Academy of Medical Sciences was considered the most prestigious scientific and medical organization in the Soviet Union. Its successor—the Russian Academy of Medical Sciences—was founded in 1992.

### Sapienza University of Rome, Italy

Established in 1303 by Pope Boniface VIII, Sapienza is one of the oldest universities in the world. With about 115,000 students, it's one of the largest in Europe as well.

### Tehran University of Medical Sciences, Iran

The university is the oldest, largest, and most highly ranked comprehensive higher education institute in the field of medicine and public health in Iran, offering a wide range of courses and receiving applications from students from around the globe.

### United Nations University International Institute for Global Health

UNU International Institute for Global Health is the designated UN think tank on global health and serves as a policy translation hub for UN member states, agencies and programmes. The Institute generates policy-relevant analysis by applying a gender lens to inform the development, implementation and evaluation of health programmes.

### University of Montreal, Canada

A public research university that started with less than 100 students in 1878, the University of Montreal has more than 60,000 today. Comprised of 13 faculties and more than 60 departments, it has the highest sponsored research income in Quebec.

### University of Geneva, Switzerland

Founded in 1559 as a theological and humanist seminary, the University of Geneva is renowned for emphasizing the unity of teaching and research. It's the only tertiary-level educational institution of its kind in the region.

### University of São Paulo, Brazil

Founded in 1934, the University of São Paulo arose from a combination of institutions, including a medical school. Today the largest university in Brazil is seen as the country's most prestigious educational institution.

### University of Paris, France

The University of Paris (UP) is one of the leading French research-intensive universities with over 60,000 students and a world-leading university in the fields of health sciences, physics, biology, earth and planetary sciences. UP is the result of the merger between Université Paris-Descartes, Université Paris-Diderot and the integration of the Institut de physique du globe de Paris, effective since January 2020.

### World Federation of Academic Institutions for Global Health (WFAIGH)

A global network of academic health institutions, the WFAIGH was set up to help provide evidence to inform policies on global health issues.

## Former World Health Summit speakers include:

### ACADEMIA

- Peter Agre
- Jutta Allmendinger
- Christopher Baum
- Gerd Binnig
- Elizabeth Blackburn
- Emmanuelle Charpentier
- Aaron Ciechanover
- Karl Max Einhäupl
- Peter Gruss
- Bill S. Hansson
- Leroy Hood
- John Ioannidis
- Roger D. Kornberg
- Heyo Kroemer
- Barry J. Marshall
- Randolph Nesse
- Vikram Patel
- Peter Piot
- Hans J. Schellnhuber
- Thomas C. Südhof
- Christof von Kalle
- Lothar H. Wieler
- Otmar Wiestler
- Ada E. Yonath
- Rolf M. Zinkernagel

### POLICYMAKERS

- Jane Ruth Aceng
- Kwaku Agyeman-Manu
- Hanan Mohamed Al-Kuwari
- Yukiya Amano
- Epsy Campbell Barr
- José Manuel Barroso
- Alain Berset
- Margaret Chan
- Raymonde Goudou Coffie
- Awa Marie Coll-Seck
- Francesca Colombo
- Adalberto Campos Fernandes
- Tedros Adhanom Ghebreyesus
- Hermann Gröhe
- António Guterres
- Dorcas Makgato-Malesu
- Luiz Henrique Mandetta
- Angela Merkel
- Matshidiso Rebecca Moeti
- José Ramos-Horta
- Erna Solberg
- Jens Spahn
- Ursula von der Leyen
- Frank-Walter Steinmeier
- Guido Westerwelle

### PRIVATE SECTOR

- Peter Albiez
- Werner Baumann
- Albert Bourla
- Eric Cornut
- Thomas B. Cueni
- Christoph Franz
- Steven Hildemann
- Paul Hudson
- Joseph Jimenez
- Neil Jordan
- Suresh Kumar
- Thomas P. Laur
- Freda C. Lewis-Hall
- David Loew
- Bernd Montag
- Stefan Oelrich
- Stefan Oschmann
- Hasso Plattner
- Severin Schwan
- Steve Singh
- Frans van Houten
- Dow R. Wilson

### CIVIL SOCIETY

- Inger Ashing
- Michelle Bachelet
- Christine Beerli
- Seth Berkley
- Arnaud Bernaert
- Katie Dain
- Jeremy Farrar
- Henrietta Fore
- Bill Gates
- Norbert Hauser
- Dagfinn Høybråten
- Wolfgang Ischinger
- Jayasree Iyer
- Joanne Liu
- HRH Princess Dina Mired
- Trevor Mundel
- Joy Phumaphi
- Peter Sands
- Gayle E. Smith
- Pavan Sukhdev
- Elhadj As Sy
- Helle Thorning-Schmidt
- Kevin Watkins
- Heidemarie Wieczorek-Zeul

## The World Health Summit has been working with various organizations, including:

- Access to Medicine Foundation
- Association of Research-Based Pharmaceutical Companies (vfa)
- Charité – Universitätsmedizin Berlin
- Bayer Foundations
- Berlin Institute of Health (BIH)
- Bill & Melinda Gates Foundation
- Coalition for Epidemic Preparedness Innovations (CEPI)
- Doctors without Borders
- Einstein Foundation
- Else Kröner-Fresenius-Foundation
- European Commission
- European Federation of Pharmaceutical Industries and Associations (EFPIA)

- The Global Fund
- Transparency International
- UNICEF
- United Nations
- Weizmann Institute of Science
- Wellcome Trust
- World Bank
- World Economic Forum
- World Health Organization (WHO)
- World Wide Fund For Nature (WWF)

## M8 ALLIANCE EXECUTIVE COMMITTEE

**CHARLES IBINGIRA**  
International President  
2020 & 2021  
Former Principal,  
Makerere University College  
of Health Sciences,  
Uganda

**AXEL RADLACH PRIES**  
World Health Summit President  
Dean, Charité –  
Universitätsmedizin Berlin,  
Germany

**EUGENIO GAUDIO**  
International President  
2022  
Former Rector,  
Sapienza University, Rome,  
Italy

**DETLEV GANTEN**  
Founding President  
World Health Summit  
Charité – Universitäts-  
medizin Berlin,  
Germany

**MICHAEL J. KLAG**  
Former Dean,  
Johns Hopkins Bloomberg  
School of Public Health,  
USA

**BEN CANNY**  
Former Head,  
School of Medicine,  
University of Tasmania,  
Australia

**ALI JAFARIAN**  
Former Chancellor,  
Tehran University  
of Medical Sciences,  
Iran

**TARCÍSIO ELOY PESSOA  
DE BARROS FILHO**  
Dean, Faculty of Medicine,  
University of São Paulo,  
Brazil

## WORLD HEALTH SUMMIT SCIENTIFIC COMMITTEE

The Scientific Committee consists of the M8 Alliance Executive Committee and these Council members:

## CO-CHAIRS

**STEFAN KAUFMANN**  
Director Emeritus  
Max Planck Institute  
for Infection Biology,  
Germany

**CARLOS SANTOS**  
Chairman of the Board  
of Directors  
Coimbra University  
Hospital Center,  
Portugal

## MEMBERS

**TILL BÄRNINGHAUSEN**  
Director  
Heidelberg Institute  
of Global Health,  
Germany

**ELIZABETH BLACKBURN**  
Nobel Prize laureate (2009),  
President Emerita  
Salk Institute for  
Biological Studies,  
USA

**BEN CANNY**  
Former Head  
School of Medicine,  
University of Tasmania,  
Australia

**THOMAS B. CUENI**  
Director General  
International Federation  
of Pharmaceutical  
Manufacturers &  
Associations (IFPMA),  
Switzerland

**CHRISTIAN DROSTEN**  
Director  
Institute of Virology  
Charité – Universitäts-  
medizin Berlin,  
Germany

**TARCÍSIO ELOY PESSOA  
DE BARROS FILHO**  
Dean  
Faculty of Medicine,  
University of São Paulo,  
Brazil

**DETLEV GANTEN**  
Founding President  
World Health Summit,  
Germany

**EUGENIO GAUDIO**  
Former Rector  
Sapienza University,  
Rome, Italy

**CHARLES IBINGIRA**  
Former Principal  
Makerere University College  
of Health Sciences,  
Uganda

Former Dean  
Johns Hopkins Bloomberg  
School of Public Health,  
USA

**BÄRBEL-MARIA KURTH**  
Director  
Epidemiology and  
Health Monitoring  
Robert Koch Institute,  
Germany

**THOMAS METTENLEITER**  
President  
Institute of Molecular  
Virology and Cell Biology,  
Friedrich-Loeffler-Institut,  
Germany

**AXEL RADLACH PRIES**  
World Health Summit  
President and Dean  
Charité – Universitäts-  
medizin Berlin,  
Germany

**MAIKE SANDER**  
Director  
Pediatric Diabetes Research  
Center, UC San Diego,  
USA

**GÜNTER STOCK**  
President  
ALLEA  
All European Academies,  
Germany

## COUNCIL

## CO-CHAIRS

**ILONA KICKBUSCH**

The Graduate Institute of International and Development Studies

**ELHADJ AS SY**

Kofi Annan Foundation, Switzerland

## MEMBERS

**ALA ALWAN**

University of Washington, Department of Global Health

**RIFAT ATUN**

Harvard T.H. Chan School of Public Health

**TILL BÄRNIGHAUSEN**

Heidelberg University

**GUNTHER BEGER**

Federal Ministry for Economic Cooperation and Development

**INGO BEHNEL**

German Federal Ministry of Health

Managing Director iNG innovation. Nachhaltigkeit. Gesundheit Germany

**REINHARD SCHÄFFERS**

Former German Ambassador Germany

**ANSGAR TIETMEYER**

Former Head of Public Affairs Deutsche Bank AG Germany

**CHARLES YANKAH**

Chairman Afrika Kulturinstitut e.V., Berlin Germany

“COVID-19 has revealed a collective failure to take pandemic prevention, preparedness and response seriously and prioritize it accordingly.”

**VICTOR J. DZAU**  
President, National Academy of Medicine, USA

“Since its inception some 10 years ago the BIH operates in national and international networks to improve the process of translation in medicine and conferences such as the World Health Summit are highly important for this path.”

**CHRISTOPHER BAUM**  
CEO, Berlin Institute of Health (BIH), Germany

“Science may be global, but healthcare delivery is very local and that is why technology becomes such a critical and important part of the solution.”

**TERESA GRAHAM**  
Head of Global Product Strategy, Roche Pharmaceuticals, Switzerland

“The COVID crisis has disrupted most health system and in Europe it has highlighted our shortcomings.”

**STÉPHANIE SEYDOUX**  
Ambassador for Global Health, Ministry for Europe and Foreign Affairs (MEAE), France

“The pandemic to me also highlights the importance of social sciences and social thinking along the process.”

**VERONIKA VON MESSLING**  
Director-General of the Life Sciences Division, Federal Ministry of Education and Research (BMBF), Germany

“The EU is an incredibly important partner in multilateralism.”

**BERNHARD SCHWARTLÄNDER**  
Chief of Staff, World Health Organization (WHO)

“Research on its own is not enough. It has to come together with a broad coalition of agencies, organizations and peoples from different backgrounds in order to make that research a reality for people's lives.”

**JEREMY FARRAR**  
Director, Wellcome Trust, UK

“This is the wake-up call for the importance of global coordination. And we need to make sure that we have more focus on global solidarity and multilateral cooperation than ever before.”

**INGER ASHING**  
CEO, Save the Children International, UK

“Universal Health Coverage is only possible if everyone is included. Therefore, we need community to be integrated in the political decision-making bodies.”

**RICARDO BAPTISTA LEITE**  
Founder and President, UNITE, Portugal

“Given the fact that no one is safe unless everyone is safe, we have to do this with solidarity and international cooperation, a global problem requiring a global solution of bringing together everybody that needs to do it.”

**SETH BERKLEY**  
CEO, Gavi, the Vaccine Alliance, Switzerland

“We have to have much better collaboration and that's independent of politics.”

**PAUL STOFFELS**  
Vice Chair of the Executive Committee and Chief Scientific Officer, Johnson & Johnson, USA

“Global strategies to tackle the Corona pandemic are also the focus of the World Health Summit from today on.”

ARD TAGESCHAU  
(prime time edition)  
Germany

“Last week’s World Health Summit underlined the depth of the setbacks to global goals caused by the crisis while UN agencies called for more co-operation on science and the WHO chief hit out at the failure of global leadership.”

FINANCIAL TIMES  
UK

“In an online session of the World Health Summit, Guterres made a call for worldwide solidarity in the global crisis and demanded that developed countries support health systems in countries that are short of resources.”
